# ACCESS LIFT & ELECTRICAL

COMPACT HOME LIFTS  
COMMERCIAL LIFTS  
STAIRLIFTS

**Welcome to Access Lift and Electrical – Your Trusted Local Experts in Accessibility**

Access Lift and Electrical is a family-owned, Far North Queensland business that has proudly served our community with lift and stairlift solutions for years. We understand the importance of safety, comfort, and independence. Whether you're looking for a lift in your home or an access solution for your workplace, we're here to make it easy and affordable.

Our customers often share that our lifts have helped them regain independence and move freely throughout their homes again—something they once thought was out of reach. With a range of options and price points, we work to find the perfect solution for you.

We've built strong partnerships with well-known, trusted suppliers in Australia and internationally, giving you access to the latest and most advanced technology in home lifts and stairlifts. Each product we offer is carefully selected to meet high standards of quality, design, and ease of use.

As one of the few companies licensed and insured in compliance with Queensland laws, we ensure every step—from consultation to installation and ongoing maintenance—meets the highest standards. We're also proud to follow and exceed the Australian Lift Code (AS1735) and Building Code of Australia, giving you peace of mind.

For more information on how we can help make your home more accessible, please visit our website at [www.accesslift.com.au](http://www.accesslift.com.au), or call Marc or Liz directly at 07 4000 4893 Or 0475 037 938 to arrange a free measure and quote.

**Warmly**

## GEMINI

### Accessible, Stylish & Luxurious since 1995

After the proven success of the original Gemini's lift structure and our oil hydraulic system, we have been able to combine the two to provide a lift that is reliable, cost-effective and easy to service.

Boasting a lifting capacity of 350kg, the Gemini 16 is flexible in sizing whilst also being quiet and fast in operation.

#### SAFETY FEATURES

Supplied with an impressive list of standard safety features, the Gemini 16 offers peace of mind with its in-car emergency telephone, infra-red door sensors, emergency battery backup lowering system and lighting. On top of that, the machine cabinet has a very easy to use manual lowering valve, should the lift car ever need to be lowered.

#### PEACE OF MIND

Manufactured in Australia since 1994. Built to Australian conditions. Guaranteed availability of parts for 15 years. Industry-leading Warranty. Custom built to your specification. Unrivalled after-sales service.

#### COST EFFECTIVE

Self Supporting Shaft - no load-bearing walls required. No separate machine room construction required. Lift is pre-assembled and commissioned at our factory before dispatch to site. Low service costs and power consumption. Can be installed externally up to wind region C3.

#### INSTALLATION

Usually installed within a day or two, by either craning in, dismantling or maneuvering into place, the Gemini 16 offers diversity depending on location and access.

#### MAINTENANCE

For optimum performance, reliability, and long term use, the lift should be serviced every 12 months by an approved lift technician.

#### CUSTOMISATIONS

Each lift is custom designed and constructed to your requirements with an impressive list of options available including: Automatic door operators; Voice Control of the lift; Access Control security features; Flood switch sensors for flood zones; and door options to match your existing property.

## PIONEER

**Accessible, Stylish & Luxurious since 1995**

Capable of servicing up to two levels, with a maximum travel of 3.9 meters, the Pioneer is powered by an advanced hydraulic system that not only pushes the boundaries of residential lift performance, but also dramatically reduces the pit and overhead height requirement.

Designed for installation into a timber lift well the Pioneer provides flexibility in speed, a reduced footprint, and custom finishes. With lifts installed in over 5000 locations Australia-wide, you can rest assured of the highest quality and guidance every step of the way.

To put your mind at ease, we offer a detailed lift consultancy service to identify and customise the best product fit for you.

### SAFETY FEATURES

Supplied with an impressive list of standard safety features, the Pioneer offers peace of mind with its in-car emergency telephone, emergency battery backup lowering system and lighting. On top of that, the Pioneer has a very easy to use manual lowering valve, should the lift car ever need to be lowered.

### INSTALLATION

Supplied assembled & pretested, the design of the Pioneer allows for easy installation by either craning in, dismantling or manoeuvring into place. Able to be installed within 3 – 4 days, the Pioneer is perfect for new or existing buildings as time on site is minimal.

### PEACE OF MIND

Manufactured by a family owned and operated company. Australian made to Australian Standards. Built to superior specifications using quality materials. Warranty on parts and labour. Lift delivered, installed & tested by qualified lift technicians. Custom built to your specification. Lift shaft can be finished to match existing architecture. Unrivalled after-sales service.

### MAINTENANCE

For optimum performance, reliability, and long term use, the lift should be serviced every 6 – 12 months by an approved lift technician.

### COST EFFECTIVE

Self-supporting lift tower – no load bearing walls required. No separate machine room construction required. Only 150mm pit depth. Low installation / construction costs. Low running costs / power consumption. Single phase 240v power. Bi – Annual maintenance. Suitable for internal or external installation.

### CUSTOMISATIONS

Each lift is custom designed and constructed to your requirements with an impressive list of options available including: Automatic door operators; Voice Control of the lift; Access Control security features; Flood switch sensors for flood zones; and door options to match your existing property.

## PHOENIX

**Accessible, Stylish & Luxurious since 1995**

For multi-story homes, the Phoenix pushes the boundaries of what's possible with a residential lift.

It's the high-performance option that's fast and customisable to suit any requirements.

With lifts installed in over 5000 locations Australia-wide, you can be rest assured of the highest quality and guidance every step of the way.

To put your mind at ease, we offer a detailed lift consultancy service to identify and customise the best product fit for you.

### SAFETY FEATURES

Supplied with an impressive list of standard safety features, the Phoenix offers peace of mind with its in-car emergency telephone, infra-red door sensors, emergency backup battery systems, and emergency lowering facilities.

### PEACE OF MIND

Manufactured in Australia since 1994. Built to Australian conditions. Guaranteed availability of parts for 15 years. Industry-leading Warranty. Custom built to your specification. Unrivalled after-sales service.

### INSTALLATION

Supplied, assembled and pretested, the design of the Phoenix allows for easy installation by either craning in as a single piece or by dismantling and reassembling. Installation can be completed within as little as one day.

### MAINTENANCE

For optimum performance, reliability, and long term use, the lift should be serviced every 12 months by an approved lift technician.

### COST EFFECTIVE

Self Supporting Shaft - no load-bearing walls required. No separate machine room construction required. Lift is pre-assembled and commissioned at our factory before dispatch to site. Low service costs and power consumption. Can be installed externally up to wind region C3.

### CUSTOMISATIONS

Each lift is custom designed and constructed to your requirements with an impressive list of options available including: Automatic door operators; Voice Control of the lift; Access Control security features; Flood switch sensors for flood zones; and door options to match your existing property.

## ORION

Residential & Commercial Lift

**Accessible, Stylish & Luxurious since 1995**

The largest lift available from Aussie Lifts, Orion provides a gentle and reliable ride.

With an impressive array of safety features and reduced construction costs, it's ideal for education and community organisations.

With lifts installed in over 5000 locations Australia-wide, you can be rest assured of the highest quality and guidance every step of the way.

To put your mind at ease, we offer a detailed lift consultancy service to identify and customise the best product fit for you.

### SAFETY FEATURES

Supplied with an impressive list of standard safety features, the Orion offers peace of mind with its in-car emergency telephone, emergency battery backup lowering system and lighting.

On top of that, the Orion has a very easy to use manual lowering valve, should the lift car ever need to be lowered.

### INSTALLATION

Supplied assembled & pretested, the design of the Orion allows for easy installation by either craning in, dismantling or maneuvering into place. Able to be installed within 3 – 4 days, the Orion is perfect for new or existing buildings as time on site is minimal.

### PEACE OF MIND

Manufactured by a family owned and operated company. Australian made to Australian Standards. Built to superior specifications using quality materials. Warranty on parts and labour. Lift delivered, installed & tested by qualified lift technicians. Custom built to your specification. Lift shaft can be finished to match existing architecture. Unrivaled after-sales service.

### MAINTENANCE

For optimum performance, reliability, and long term use, the lift should be serviced every 6 – 12 months by an approved lift technician.

### COST EFFECTIVE

Self-supporting lift tower – no load bearing lift shaft walls required. No separate machine room construction required. Only 150mm pit depth. Low installation / construction costs. Low running costs / power consumption. Bi – Annual maintenance. Suitable for internal or external installation.

### CUSTOMISATIONS

Each lift is custom designed and constructed to your requirements with an impressive list of options available including: Automatic door operators; Voice Control of the lift; Access Control security features; Flood switch sensors for flood zones; and door options to match your existing property.

## THE MARINER 16

### ***Oil Hydraulic Chain Over Commercial Lift***

Offering a budget solution in providing multi-level disabled access to a commercial premises. The Mariner 16 is ideal for schools, factories, churches, organisations & government buildings.

Built to Australian Standard 1735 part 16, the Mariner 16 lift is BCA E3.6 and E3.3 compliant and is perfect for complying with the disabled access regulations for commercial buildings, whether it be for a new or existing building.

Capable of servicing up to four levels with a maximum travel of 7.150 metres, the Mariner is powered by an advanced chain-over oil hydraulic drive system that requires no overhead space or structural support. Offering an alternative to the costly expense associated with providing load bearing walls, large slab footings and a machine room, the Mariner 16 comes complete with its own light-weight self supporting lift shaft, landing doors and machine cabinet. Requiring only days to install, the Mariner 16 lift is custom built in Australia resulting in short lead times. Rated for 350kg, the Mariner 16 can easily carry three people and has a car size of 1100mm x 1400mm x 2100mm, between the sensors.

#### SAFETY FEATURES

#### PEACE OF MIND

#### COST EFFECTIVE

Supplied with an impressive list of standard safety features, the Mariner offers peace of mind with its in-car emergency telephone, light ray door sensor, emergency battery backup lowering system and lighting. On top of that, the Mariner has a very easy to use manual lowering valve, should the lift car ever need to be lowered.

Each lift is custom designed and constructed to your requirements with an impressive list of options available including: Single / Dual Entry, Automatic door operators; Various door options, Emergency stop button, alarm and phone, Light curtain sensors across the door entrance, stainless steel handrail

\*All Aussie Lifts are Australian owned and made in Brisbane. All Aussie lifts are manufactured with a self-supporting shaft and require no load bearing walls.

## SWIFT PRO

### ***A Residential Lift with Intelligence***

SWIFT Pro is our most advanced residential lift with premium design features, a dynamic touch display and several options for personalised settings.

Set floor names, add descriptions and choose icons from the SWIFT library.

Add some spice to your upward travel experience by adjusting the shaft light colour and intensity on the display for a different experience each time.

### ***Safety and Peace of Mind***

A home should be safe for all members of your family – children, grandparents and pets included. That is why we developed safety sensors and smart doors to prevent children's fingers from getting squeezed and even equipped the lift with features such as child lock or options to restrict users from accessing certain areas of your home. We also made sure our residential lift has dual safety breaks for complete peace of mind. All lifts can be remotely accessible by our SWIFT service team ready to provide quick support if need be.

For complete peace of mind. Thanks to the Tesla-inspired battery solution you don't need to worry about getting trapped inside the lift in case there is a mains power failure. SWIFT's unique "anti-trap" system will ensure that the residential lift continues to operate with normal speed and functionality.

The residential lift computing software is powered by Thor Engineering™ – one of the most powerful, smart and reliable elevator control systems in the world. In general the system responds 20% quicker to user commands than other systems on the market.

#### **INSTALLATION**

Supplied assembled & pretested, the design of the Mariner allows for easy installation by either craning in, dismantling or manoeuvring into place. Able to be installed within 4 – 5 days, the Swift Pro is perfect for new or existing buildings as time on site is minimal.

#### **MAINTENANCE**

For optimum performance, reliability and long term use, the lift should be serviced every 6-12 months by an approved lift technician.

#### **CUSTOMISATIONS**

Each lift is custom designed and constructed to your requirements with an impressive list of options available including: Back lit light wall, LED lighting, Choice of sustainable carpets, Touch display with pictures in your choice of display.

### SWIFT LITE

#### ***A Small Intelligent House Lift***

A small house lift designed to meet the requirements of a limited budget without compromising on style and comfort.

SWIFT Lite offers many of the same features as the SWIFT Pro such as EcoDrive, AntiTrap, SWIFT Safety and SWIFT Remote. The house lift has classic elevator buttons and a limited range of design options. The lift colour is Traffic White with a special Resin Board ArtWall, white LED side lights and a Vinyl Black flooring. SWIFT Lite is available in 4 different sizes..

#### ***Safety and Peace of Mind***

A home should be safe for all members of your family – children, grandparents and pets included. That is why we developed safety sensors and smart doors to prevent children's fingers from getting squeezed and even equipped the lift with features such as child lock or options to restrict users from accessing certain areas of your home. We also made sure our residential lift has dual safety breaks for complete peace of mind. All lifts can be remotely accessible by our SWIFT service team ready to provide quick support if need be.

THE

OPTIONS

## COMPACT ELEGANCE / PLUS

### ***Reliable, Affordable and Easy to Install Lifts.***

Specifically designed to fit easily into your home.

The Compact Home Lift range works on the principle of the lift car traveling on self-supporting rails, requiring no load-bearing walls.

In most instances, a simple ceiling aperture is all the building work that is needed. The lift rails affix to the lower level floor, the aperture insert and the ceiling of the upper level, providing strength and stability the lift requires.

The Elegance is a 2-person lift with a 170kg capacity and a remarkably small 0.8m<sup>2</sup> footprint. The clear dome lift car body of the Elegance helps it blend and fit into any room configuration. The Elegance Plus is one of the smallest vertical wheelchair lifts on the market, with a 1.44m<sup>2</sup> footprint and 250kg lifting capacity.

#### **SAFETY SENSORS**

Multiple sensors are fitted internally and externally to every Compact Home Lift to ensure that everyone remains safe both inside and outside the lift. There are safety sensors in the lift car base and roof which will stop the lift from operating if it comes into contact with any obstruction.

#### **PEACE OF MIND**

In the event of an emergency while operating your lift, an emergency phone is concealed in the lift and allows you to dial our 24 hour Emergency Service. We provide a market leading 7 Year Parts Warranty. Extended warranties also available.

#### **COST EFFECTIVE**

Compact Home Lift plugs into a single standard 10 amp domestic power socket. When running it uses less energy than if you were to boil a kettle. The self contained drive system is concealed in a space within the roof area of the lift car. Therefore, no need for an additional plant room/cabinet or other machinery.

#### **INSTALLATION**

Stocked locally and includes a fast 1-2 day standard installation, once the ceiling aperture has been created by a qualified builder. A half height gate is fitted as standard with a monitored electric lock that ensures the lift car door stays closed while moving. Full height gate options also available.

#### **MAINTENANCE**

For optimum performance, reliability and long term use, the lift should be serviced every 6-12 months by an approved lift technician.

#### **SMALL FOOTPRINT**

Our range offers an extremely compact footprint with the Elegance measuring 0.8m<sup>2</sup> and the Elegance Plus 1.44m<sup>2</sup>. The slightly larger Elegance Plus footprint will accommodate a standard-sized wheelchair, and has a footprint of 1.44m<sup>2</sup>.

## HORIZON STRAIGHT STAIRLIFT

### *The #1 Straight Stairlift Choice*

The Horizon Straight Stairlift offers the ultimate in flexibility and comfort alongside the stylish and slim-line design that defines the Horizon stair lift range.

From the choice of colours, to the powered options available as well as the choice of chair, with the fully adjustable Ergo and Ergo Plus seats, the Horizon really is the next level in stairlifts and yet surprisingly affordable too.

The Horizon Plus Straight Stairlift comes with a host of premium features:

- ✓ Extruded Aluminium Rail – up to 7.5m
- ✓ Slimline rail design leaves plenty of space on the stairs
- ✓ Rack and Pinion drive system – safe and smooth
- ✓ Rack gear is guarded for safety & cleanliness
- ✓ Safe, reliable and quiet 24v DC powered drive system
- ✓ Safe low voltage charging uses an existing power outlet
- ✓ Safety sensors to carriage & footrest
- ✓ 140 kg user weight limit
- ✓ Manual swivel seat
- ✓ Two Remote controls can be wall mounted
- ✓ Deluxe Ergo seat system for best fit and comfort
- ✓ Adjustable seat back and arms
- ✓ Adjustable seat height
- ✓ Footrest lifting lever – no bending down to pick up the footrest
- ✓ Diagnostic display in chair arm
- ✓ Ergonomic joystick control in arm
- ✓ Retractable seat belt
- ✓ Sideways adjustable footrest for greater flexibility

#### HORIZON PLUS STRAIGHT STAIRLIFT OPTIONS

- ✓ Powered folding rail
- ✓ Powered swivel seat – turns automatically at the top of the stairs
- ✓ Outdoor version available
- ✓ Range of seat options – Ergo and Ergo Plus seats
- ✓ Choice of seat upholstery colours

## PLATINUM CURVED STAIRLIFT

### *The Smooth Choice*

A curved stairlift can be needed when your stairs have turns or landings in them.

It is not safe to use a straight stairlift when it means you have to get off the lift part way up the stairs because it goes around a corner.

A curved stair lift will safely take you from one level to the next, with its curved rail system taking you smoothly around the corners. At Ideal Stairlifts we have a curved

stairlift solution for every situation making us your one-stop shop. We offer both the Platinum Curve and also the Platinum Ultimate curved stairlifts

The Platinum Curved Stairlift comes with a host of premium features:

- ✓ Parking bend options – the lift can be conveniently parked away from the top or bottom of the stairs. Can also make getting on or off the stairlift easier and safer
- ✓ Powered swivel seat – turns the chair automatically at the top of the stairs for easy access and dismount
- ✓ Powered footrest lifter option – lift the footrest at the touch of a button
- ✓ Heavy Duty option – up to 160kg weight capacity
- ✓ Range of ERGO seat options – for fit and comfort
- ✓ Range of chair upholstery colours – to match existing decor
- ✓ Optional special rail colours
- ✓ Intermediate landing or parking stops
- ✓ Perfect Fit. Custom-made to your stairs means a perfect fit every time
- ✓ Safe Smooth & Reliable. Rack and pinion drive system with mechanical levelling on a 24v DC powered motor.
- ✓ Easy-use joystick operated on-board control also with two remote controls – wall mounted top and bottom
- ✓ Great for Tight Bends. Fits to either side of the stairs – Inside or Outside bends. Tight bends fit snugly, close to the wall leaving maximum clear space with 200mm radius bends.
- ✓ Fully adjustable ERGO Seat with choice of chair colours, folding chair arms and footrest.
- ✓ Safe Charging. Safe low voltage charging uses existing mains electric outlet where possible
- ✓ Retractable seatbelt & Safety sensors that stop the stairlift automatically if it meets an obstruction
- ✓ Strong. 120kg capacity (160kg optional)

## ULTIMATE CURVED STAIRLIFT

### *The Ultimate Choice*

The Ultimate curved stairlift runs on a single tube rail only 8cm in diameter ensuring it is neat and unobtrusive. The sleek and stylish curved stairlift rail fits close to the wall and hugs the corners. This means that it can take up less space on the stairs as well as looking great. The optional first-step Smart Start rail is unique to the Ultimate curved stairlift and eliminates any intrusion into the lower landing. Innovative design ensures we can fit the Ultimate to most stairs no matter how steep or narrow.

The Ultimate Curved Stairlift comes with a host of premium features:

- ✓ Standard Vertical Start. The rail starts vertically only 160mm from the first step meaning it is neat and unobtrusive
- ✓ Optional 1st Step 'Smart Start'. Unique to the Ultimate, the rail can start on the 1st step and still lower the user safely to the ground. This means there is no rail at all intruding into the lower floor. Perfect for an open hall or foyer, or when there's a door at the bottom of the stairs.
- ✓ Single Tube Rail. Neat, modern and stylish. The tubular stairlift rail fits close to the stairs ensuring your stairlift is both functional and stylish.
- ✓ Heavy Duty. The standard 120kg capacity is enough for most, but the Ultimate can be supplied with a 160kg rating where the need arises.
- ✓ Two Way Power Swivel. Allows the stairlift chair to turn at the top of the stairs and at the bottom for easy access even in tight spaces. The powered swivel seat can also turn during travel allowing the Ultimate to accommodate even the narrowest staircases.
- ✓ Adjustable Seat. The Ultimate Stairlift seat can be adjusted for best fit and comfort as well as to give extra clearance for taller users. The footrest adjusts up and down for an additional feeling of stability while travelling.
- ✓ Tight Bend Radius. The 210mm internal bend radius ensures that we can keep the rail as close to the wall or railings as possible and maximises clear space on the stairs for others.
- ✓ Ultimate Control. The battery powered arm controls can easily be moved from one side to the other. Reliability is improved by eliminating control wires in the arms and seat that can be broken in use. Remote controls are also supplied for each level.
- ✓ Multi-Level. In homes with 3 or more levels the Ultimate is the perfect lift solution. Stops can be set at each landing and, of course, additional remote controls are supplied. With travel up to 28m the Ultimate is the perfect fit for even the largest homes.
- ✓ Choice of Colours. 5 chair upholstery colours are available as standard to blend the Ultimate with your home decor. Other upholstery colours are available on request as optional extras. Special rail colours can also be ordered.

## OUTDOOR STAIRLIFT

### ***Curved or Straight - Waterproof & Durable***

Many Australian homes have stairs outside, perhaps from a deck into the garden, or up to the front of an elevated entrance.

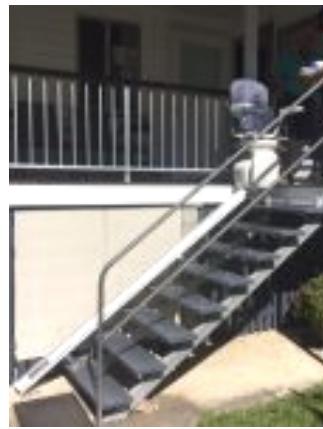

The Platinum Horizon Outdoor Stairlift is for use on straight stairs and where the staircase is outside your home or exposed to the weather. The Outdoor Curve stairlift is a specially made variant of the exceptional Platinum Curve designed specifically to withstand the rigours of outdoor installation.

The Platinum Horizon Outdoor stairlift comes with waterproof seat upholstery and a durable cover for when not in use. The electronics and workings of the lift are, of course, all fully enclosed within the body structure and treated to withstand the rigours of the Australian climate. The rail is made from anodised aluminium which will not rust, and the gear rack and other metal components are Zinc electroplated which provides exceptional corrosion protection to the steel.

The Outdoor Stairlifts comes with a host of premium features:

- ✓ Durable and Strong
- ✓ Safety and Comfort to get Outdoors
- ✓ Quality at an Affordable Price
- ✓ Specially Designed for Outdoor Use
